Software Engineering Student

SUMMARY

Software Engineering undergraduate at Sichuan University with strong foundation in full-stack development and algorithms. Proven ability to design, build, and deploy practical applications using modern technologies including Java, JavaScript, React, and Node.js. Have a strong research interest in Explainable AI (XAI), Medical AI, Three-Way Decisions, Uncertainty Quantification in Machine Learning. Seeking to leverage technical skills and academic background in a Master's program focused on software systems and advanced computing.

EDUCATION

Sichuan University, Chengdu, China

Bachelor of Software Engineering
Belt and Road Scholarship Holder
2022 - 2026 (Expected)

Chittagong Cantonment Public School, Bangladesh

Higher Secondary Certificate
2014 - 2021

TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, C++, Python, SQL, HTML/CSS
- Frameworks & Libraries: React, Node.js, Express.js
- Databases: MySQL, MongoDB
- Tools & Platforms: Git, GitHub, VS Code, Linux
- Concepts: Object-Oriented Programming, Data Structures
- Machine Learning, Python, Scikit-learn, SHAP, Research Methodology

LANGUAGES

- English (Fluent)
- Chinese (Proficient)
- Bengali (Native)
- Hindi/Urdu (Conversational)

CERTIFICATIONS

- Belt and Road Initiative Scholarship holder.
- Summer Camp Participant (SWUFE)

PROFESSIONAL EXPERIENCE

TECHNICAL PROJECTS

Hybrid Intelligent System for Medical Diagnosis | AI Research

Python, Machine Learning, Three-Way Decisions, Explainable AI (XAI)

- Researched and designed a novel framework combining 3WD theory with XAI to handle diagnostic uncertainty
- Developing ML pipeline with Three-Way Decision engine to classify cases into "Confirm Diagnosis," "Rule Out," and "Uncertain" regions
- Implementing SHAP library for generating human-interpretable explanations of AI decisions
- Addressing the "black box" problem in clinical AI while improving decision transparency

IT Intern | Suncaper, Chengdu

Big Data Project

- Managed and optimized database systems, improving data organization and operational efficiency
- Assisted in backend development operations, ensuring reliable data retrieval and system performance
- Collaborated with development teams to implement database improvements and maintain data integrity

Personal Blog Website | Full-Stack Developer

React, Node.js, Express.js, MongoDB

- Developed full-stack blog application with CRUD functionality
- Implemented responsive React frontend with component-based architecture
- Built secure RESTful API backend with Express.js and Node.js

University Banking System | C++ Developer

C++, Object-Oriented Programming

- Designed console-based banking system simulating account management
- Applied OOP principles for modular architecture
- Implemented file handling for data persistence

Data Structures Portfolio | Java & C++ Developer

Java, C++, Algorithms

- Implemented fundamental data structures (Linked Lists, Stacks, Queues)
- Developed and analyzed algorithms with focus on time/space complexity
